

● LASER COMPONENTS · AI CONNECTOR

LCConnect

Your laser-components CRM — *answered in plain language*, right inside ChatGPT and Claude.

◆ Built on the open Model Context Protocol

Ask your sales database like you'd ask a colleague.

LC Connect turns your live CRM into something you can simply talk to — no dashboards to learn, no exports to wrangle.

Plain English in

Natural-language questions

“Which sectors have the most leads?” “Show me our Nordic accounts.” No query language, no training.

Live data out

Always your real CRM

Answers are backed by live records — 393 leads, 245 products — never stale snapshots or guesses.

Rich, not raw

Interactive cards, not text walls

Results come back as sortable tables, maps, KPI tiles and timelines you can act on directly.

Where you already work

ChatGPT & Claude

It plugs into the assistants your team already uses every day. Nothing new to install or open.

See demand at a glance.

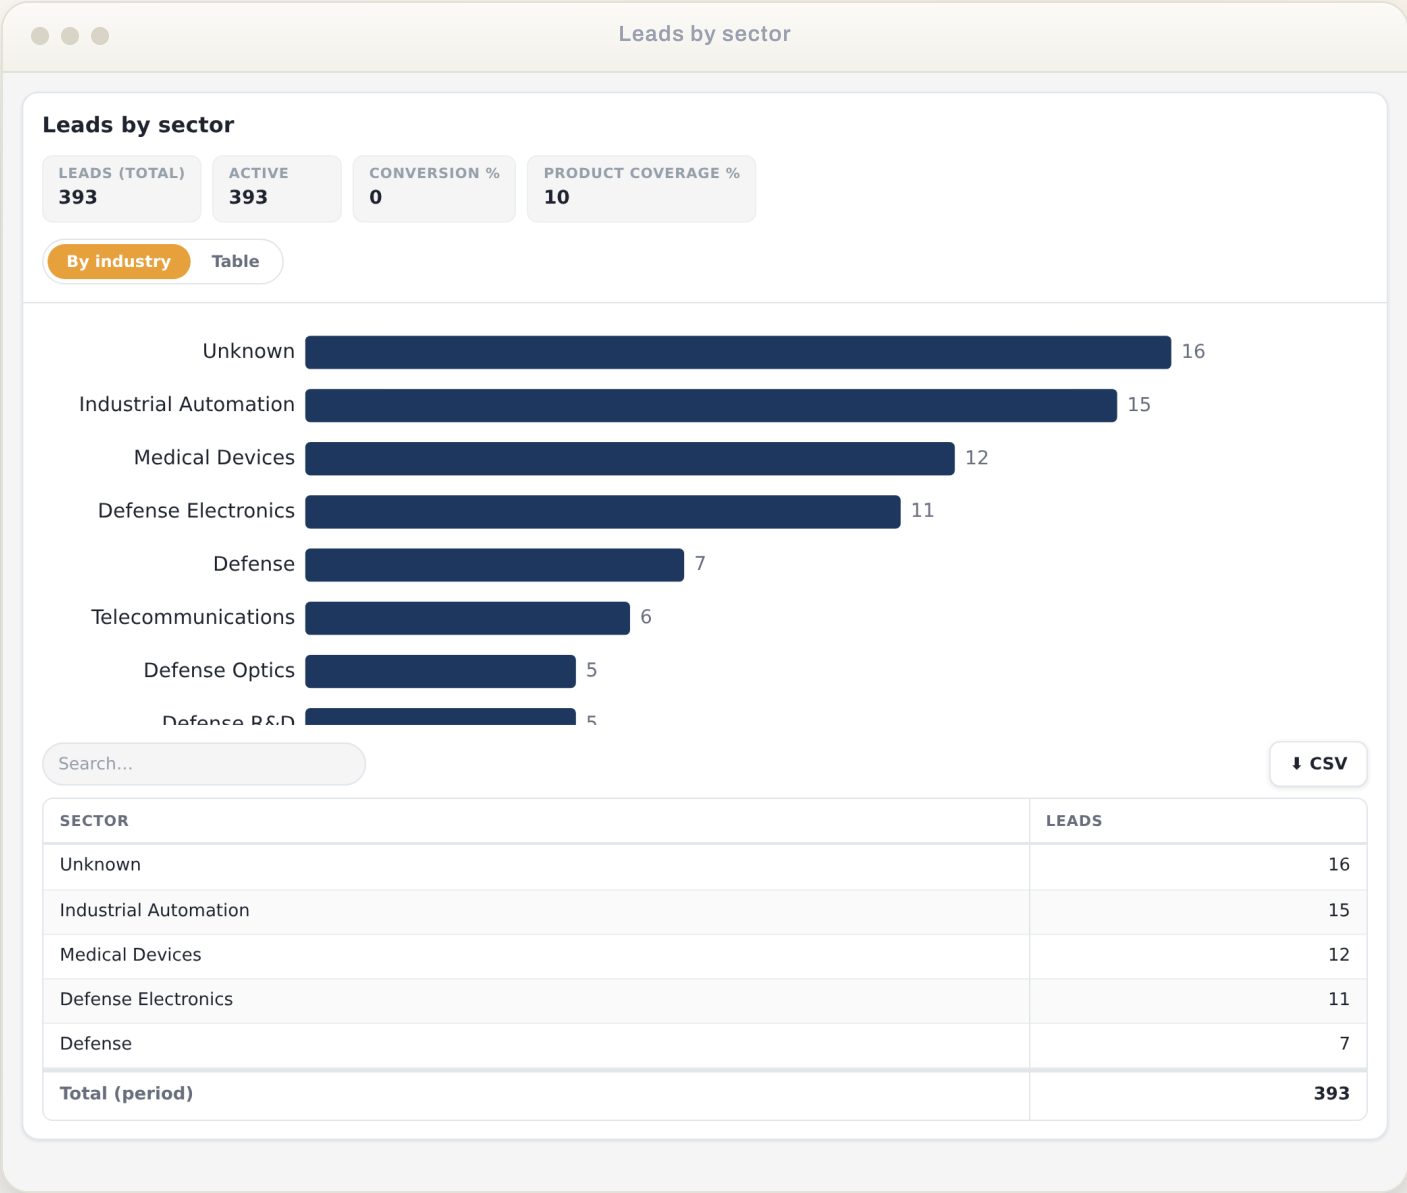

Ask for a breakdown and LC Connect returns a live, interactive dashboard — not a paragraph.

- › Leads split **by sector**, sorted and searchable in place.
- › Live **KPIs** on top — total, active, conversion, coverage.
- › **Export to CSV** in one click for your own reporting.

393 leads

Sortable

CSV export

03 · GEOGRAPHY

Where your market is.

Every lead placed on the map, so concentration jumps out without reading a single row.

- › Leads mapped **by country** as a live choropleth.
- › Toggle between **Europe and World** views, zoom freely.
- › Spot clusters instantly — here, a clear **Nordic** pull.

Choropleth

Europe / World

Nordic cluster

Your whole catalog, in chat.

The full product range, on tap — searchable, sortable, and ready to hand off.

- > **245 products** with SKU, price, category and subcategory.
- > **Search and sort** in the card; switch Key / All columns.
- > **One-click CSV** to share or drop into a quote.

05 · METRICS

The numbers that matter, instantly.

One question, the whole shape of the business — no spreadsheet open required.

- › Headline counts across **products, leads and applications**.
- › Including **product ↔ application** mappings that drive matching.
- › Clean tiles you can **read in a second** on any screen.

245 products

7 applications

76 mappings

Full context before you call.

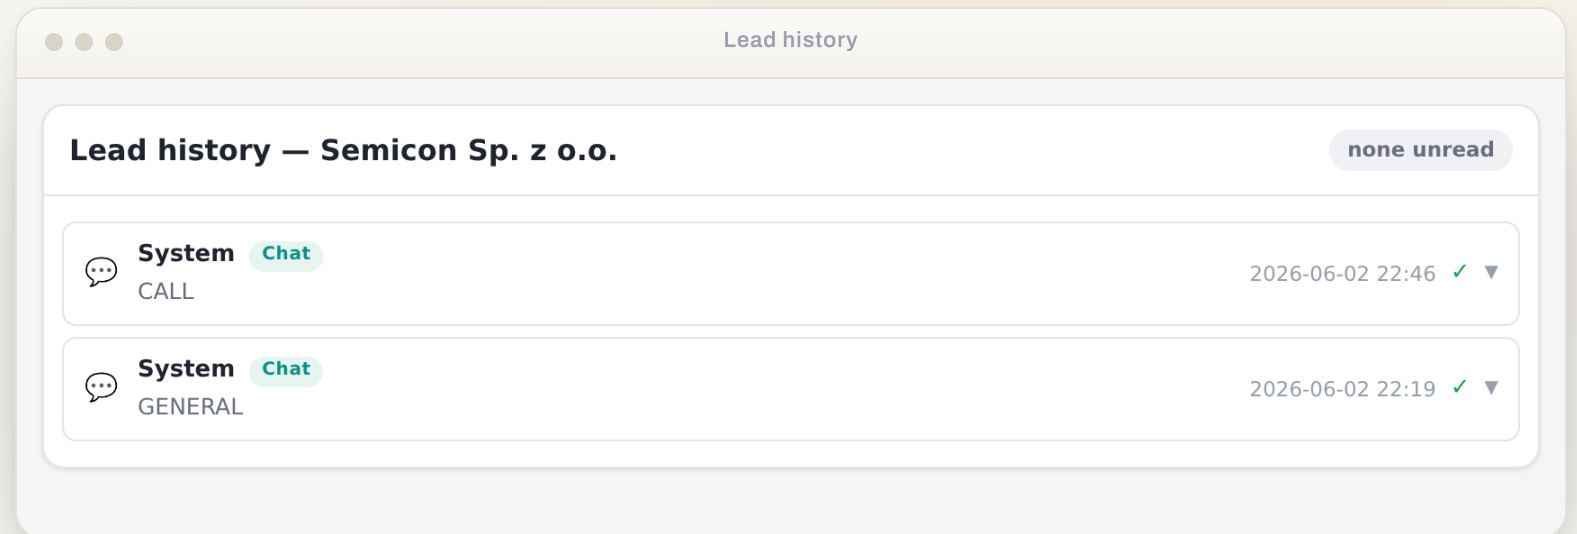

Every touchpoint on an account,
gathered into one timeline you can scan
in seconds.

- › Every **note and call** on a lead,
newest first.
- › **Timestamps and read state** so
nothing slips.
- › Ask for one account, get its **whole
story**.

Notes & calls

Read state

Note added

Note saved for lead "Hamamatsu Photonics".

Lead ID: 394

07 · SAFE ACTIONS

AI assists, you stay in control.

LC Connect can write back to the CRM — and every write is explicit and confirmed.

- › Log a note, update a lead — **done from chat**.
- › Each write returns a **clear confirmation card**.
- › You always **see exactly what changed**, and where.

Write-back

Confirmed

Auditable

Plain English in. Live answers out.

One connector sits between your assistant and your database — on an open standard, with a platform that's already proven.

01 — You

Ask in plain English

Inside ChatGPT or Claude, just like any other question.

→ 02 — LC Connect

The MCP connector

Translates the question, reads or writes the right records, returns a card.

→ 03 — Your data

The live database

Always current — your real leads, products and activity.

Same proven widget platform as *Vendo Connect* and *iKrystyna* — now for laser components.
